- Reduce the time to onboard vendors by 70%*
- Decrease manual labor tasks by more than 40% per week (> 24 hours / procurement analyst)
- Real-time visibility to procurement tasks and activities
- Increase vendor compliance by up to 40%*
- Decrease off-category spend by 30%*
- Decrease sourcing and source selection timelines by 40%*
- Increase communication with internal customers and procurement staff

*A RECENT STUDY CONDUCTED BY DELOITTE.

FEATURES

PROCUREMENT REQUEST AND SELF-SERVICE // Self-service request management for procurement requisition, sourcing, purchases, and other procurement services using a web-based and mobile-ready portal.

SOURCING // Procurement requisition and planning sourcing strategy definition, requirements collection and documentation, e-collaboration with key stakeholders, and vendor identification and market research.

eRFx POSTING AND VENDOR BID RESPONSE // Electronically publish RFXs and manage vendor responses so you can fully automate the evaluation and selection process.

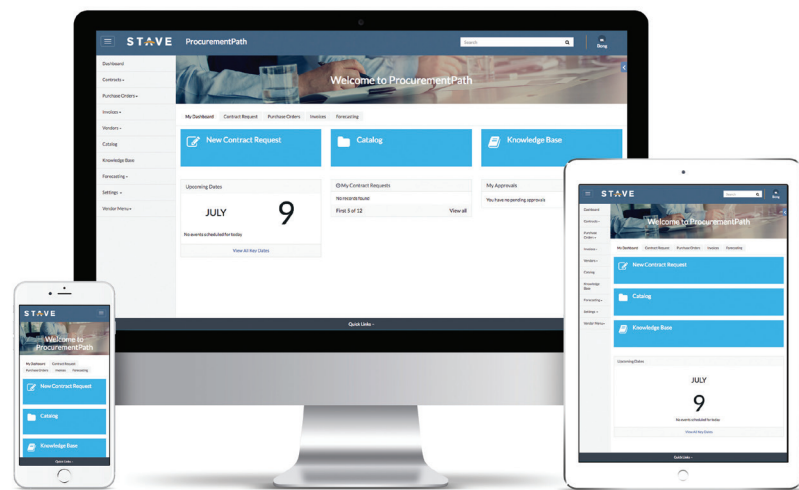

VENDOR EVALUATION AND SELECTION // Evaluate and rate vendor's solicitation responses against requirements, evaluation criteria and, separately, against each other, to make documented award decisions.

CONTRACT MANAGEMENT // Manage the full contract lifecycle from request, negotiation, award, tracking, compliance, reporting, and closeout.

PROCURE-TO-PAY AUTOMATION // Automate the end-to-end procurement process from purchase request & approvals, purchase order (PO) creation and communication, PO acceptance, goods/services receipt, invoice recording, and supplier payment approvals.

FORECASTING & DEMAND MANAGEMENT // Collaborative forecasting with internal organizations for future period sourcing, contracting, and procurement needs allows procurement to better shape customer demand and provide best-in-class service.

VENDOR ONBOARDING AND MANAGEMENT // Full vendor management including onboarding, self-service, and collaboration and compliance to manage company information, bids, contracts, communications, issues, tasks and more.

DIGITAL PROCUREMENT: NATIVE ON SERVICENOW®

Built on the ServiceNow platform, ProcurementPath automatically gives your organization a complete, ready-to-use procurement application to improve the procurement experience, increase your pace of innovation, and enable digital procurement transformation in the workplace.
